

MOMODESIGN

MAN'S  
F/W 2022-23  
COLLECTION

URBANWEAR

technology tailored

Among the product lines introduced by MOMODESIGN we find the new URBANWEAR collection.

Surprising and breaking the ordinary is part of the evolutionary spirit of MOMODESIGN, which bases its stylistic codes on innovation and design.

The Urbanwear collection satisfies the more technical needs of those who live the city in a dynamic way, with the motorbike and/or bicycle, in a metropolitan everyday life.

There are three keywords that frame and define the collection:

TECHONOLOGY TAILORED - HYPER JACKET - EASY STYLE

Balanced volumes and innovative fabrics, designed ad hoc for outdoor and beyond.

The contemporary, energetic, contrasting Milan of today is one of the main inspirations of MOMODESIGN style, which seeks refined functionality, combining transversal accessories that play on dynamism and easy comfort use.

The careful research of the most advanced fabric technology is combined with the search for an easy chic metropolitan style, in which different worlds are mixed, from sporty to elegant, creating a new stylistic code, for a transversal collection in its use.

Outwear, shirts, t shirts, sweatshirts, caps and trousers made of technical fabrics, but with minimal and fashion oriented cuts and with technical details that complete the garments together with the refined color palette.

A collection developed by Golf 360 Srl and designed by the stylist Maria Teresa Castelli, in line with the philosophy of MOMODESIGN, which is investing in innovation and research, developing a technological hub to guarantee high quality and constant innovation.

**Be elegant, be modern, be hi-tech... be MOMODESIGN URBANWEAR!**

PROGETTO  
GRAPHENE™  
INSIDE THE FUTURE

# GRAPHENE™

**Graphene is the new textile material that will change the way to make garment.**

**The unique properties of graphene, such as the thermal conductivity, electrostatic, lightness and antibacterial, make it an interesting material for different application.**

**Graphene is an innovative nanotech soft and light material, characterized by high conductive capacities that care the regulation of body temperature.**

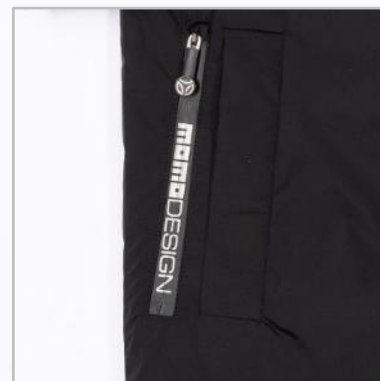

**The warm in hot weather conditions is dispersed, while in the presence of low cold temperatures it is equally distributed stabilizing inside temperature.**

COLORS

# CORTINA - MD-JK2309

CORTINA is the first of the two most versatile outerwear in this collection.

The Outside is made with European yarn in a water-repellent wool blend, while the Inside is lined in anti-pilling fleece: the combination of these two fabrics makes the garment warm and comfortable, particularly suitable for mid-seasons as outerwear and as an under-jacket in the colder season. It is proposed in three color variants.

The garment features unique customizations and cutting-edge technical finishes, such as the color matched die-cast front zip with personalized zip puller and the exclusive rubberized MOMODESIGN label.

The hood, also lined with fleece, and the external pockets complete the garment.

## Features:
